

New repository

Q Type to search

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk ()*

Repository template

No template

Start your repository with a template repository's contents.

Owner *

stdJung

Repository name *

temp-repo

temp-repo is available.

Great repository names are short and memorable. Need inspiration? How about [automatic-octo-guacamole](#)?

Description (optional)

☒ Public

Anyone on the internet can see this repository. You choose who can commit.

☐ Private

You choose who can see and commit to this repository.

Initialize this repository with:

☒ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add gitignore

gitignore template None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: MIT License

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

This will set `main` as the default branch. Change the default name in your [settings](#).

ⓘ You are creating a public repository in your personal account.
